

## 2013 Sprint 1 & 2 WEI Admin and Online Voters' Guide Updates

Issue	Category	Sub-Category	Item	Description
3503	WEI Admin	Candidates	Copy statements forward should also copy approval status forward	When counties use the global copy statements forward from Primary to General, it should also bring their approval status forward. So if the statement was approved in the Primary, it will show approved for the General. (Same for unapproved.)
3528	WEI Admin	Candidates	Photo/Statement - download not working properly.	Pierce and Snoho had problems downloading their photos/statements for the Primary. For statements without a website address, it errors out for multiple statements. It also does not include the statement when downloading one.
3541	WEI Admin	Candidates	Photos/Statements - The search and icon pictures doesn't indicate photos/statements received.	Photos/Statements - The search and icon pictures doesn't indicate photos/statements received for candidates checked out of the election (Primary). The only way for a county to see who submitted a photo/statement once they have unchecked them from the Primary is by exporting to excel.
3069	WEI Admin	Jurisdictions	Details - Add a remarks field to the Jurisdiction Detail page for counties to track superintendents or secretaries for junior taxing districts	Counties would like to have a remarks field on the jurisdiction detail screens for their jurisdictions so they could keep the names of the school district superintendents or the fire district secretaries handy. It would be useful to be able to display the information out to their WEI websites on a page that lists all the jurisdictions in the county.
3508	WEI Admin	Jurisdictions	Details - Allow county to edit jurisdiction type and code in jurisdiction detail.	
3252	WEI Admin	Jurisdictions	Details - Website field - allow http://apps.leg.wa.gov/...	The website field is validating, and it doesn't allow apps.leg.wa.gov/...
3462	WEI Admin	Jurisdictions	Details, order the precincts.	Order by precinct code, precinct part code.

3063	WEI Admin	Measures	Add 'remove all formatting' button to Tiny MCE editor on WEI Admin.	Counties and the state often use Microsoft Word to paste text into measure and candidate statement text boxes. Often Word puts in html formatting that causes the text to render in unpredictable ways on the internet. It would be best to be able to strip out the html formatting from all the text using button on the tool bar. Scenario: User pastes text from Word into a text box while adding a measure to WEI admin. Formatting looks bad, so they click a button in the tiny mce tool bar that strips out all html formatting and the text reverts to the default appearance as determined by css on the county/state master page. need additional documentation for this item
3148	WEI Admin	Measures	Advisory - voting record pdf not showing.	Add a button to WEI Admin to display the pdf that is uploaded for the Voting Record in Advisory measures.
3191	WEI Admin	Measures	Details - Allow counties to add complete text URL for measures in WEI Admin.	The OVG is showing a link to Complete Text - but counties can't upload the file, only the state can.
3492	WEI Admin	Measures	Details - Do not allow user to input a Short Description of more than 100 characters	The Initialize Races process will crash if a measure's Short Description field contains more than 100 characters. The system should enforce an upper bound of 100 characters in this field.
1928	WEI Admin	Measures	Details - Link to complete text	1) Take validation out of link field. We will control putting in proper link. 2) (Related to this - counties can't upload a full text file, but the link is showing on the OVG for their local measures. Add field in WEI Admin for county measures so they can link to full text.)
3467	WEI Admin	Measures	Search - After searching, allow user to go back to search grid	[SN Wendy] When you want to proof your measures, you search for an election, and get a grid of all measures. Then when you go into one to proof it or update it, and you want to go to the next one, you have to re-search. (Click to open measures in new window.) Also needed for Candidates Search.
3491	WEI Admin	Measures	Search - In measure search, default to the current election	In Measures > Search, in the drop-down menu next to "Election:", the choice should default to the current election, rather than after the latest election in the system.
3284	WEI Applets	OVG	Ampersand in office name displays as HTML code	Ampersand in office name displays as & on OVG. See <a href="http://weiapplets.sos.wa.gov/MyVote/onlinevotersguide?language=en&amp;electionId=42&amp;countyCode=th&amp;Group=Local">http://weiapplets.sos.wa.gov/MyVote/onlinevotersguide?language=en&amp;electionId=42&amp;countyCode=th&amp;Group=Local</a> (search for "Tanglewilde").
1796	WEI Applets	OVG	'Approval - Post Measure Statements ' - if 'No', the statements should not display in OVG	For example, Initiative to the Legislature 502, only the content/fields above the approval section should be displaying online because only the first approval is marked yes. Tdavis email 06282012 0922 [Dale also fixed 'Final passage votes' - data was showing when +. and not when -.

3231	WEI Applets	OVG	Asterisk next to county name undefined	Reported by T Davis: In the list of counties in the district, some counties have an "*" . Where's the footnote?
3228	WEI Applets	OVG	Bold candidate name	Reported by T Davis: In the display of a candidate's detail, the candidate's name should be bold (also on the print-friendly screen)
1832	WEI Applets	OVG	Display - "view all" only available when CountyCode=xx	The option to view all candidates in a particular contest is only available for the statewide version of the OVG and does not appear for any of the county versions.
3213	WEI Applets	OVG	Full Text link - don't display this on OVG if there is not data in this field.	Pmurphy email 10262012 0800: 1) Only display full text link for local measures if there is a URL in the appropriate field in the table. If no URL, don't display Full Text link for local measures.
3340	WEI Applets	OVG	Improve search functionality	Presently you have to know the jurisdiction of the candidate you are looking for - need to be able to search by name
3229	WEI Applets	OVG	Menus should start collapsed	Reported by T Davis: Menus should start collapsed with a maximize/minimize (+/-) symbol; menu subheadings in blue text boxes should remain consistent in size/width whether they are minimized or maximized.  TDavis, 3/25/2013: This isn't a big deal in 2013 for the state, but it is for counties, and it is huge for us in 2014
3482	WEI Applets	OVG	OVG doesn't display page title.	Page title should display - Election name and Voters' Guide - 2012 General Election Voters' Guide
3099	WEI Applets	OVG	OVG measures should only display fields if there is data in the field. If no data, then no display	The counties use some, but not all of the fields in the measures detail area The way they want it is if they leave a field blank, there should be no field header or any other display of information on the OVG. <a href="https://weiapplets.sos.wa.gov/MyVote/OnlineVotersGuide/Measures?language=en&amp;electionid=36&amp;countyCode=pi&amp;ismyVote=False#ososTop">https://weiapplets.sos.wa.gov/MyVote/OnlineVotersGuide/Measures?language=en&amp;electionid=36&amp;countyCode=pi&amp;ismyVote=False#ososTop</a> See the Rebuttal For and Rebuttal Against areas - Pierce does not use these fields and therefore does not want them to show up on the page. ----- The rebuttals area still shows up. Can you make those blocks behave like the Written By and Fiscal Statement blocks that don't show up if you don't put anything in there?

3234	WEI Applets	OVG	Set office name, partisan and office term spacing	Reported by T Davis: In some races, the office (top line), and Partisan and Term (second line) make up two lines, and in other offices, despite the same language, it is on 4 lines (Jaime Herrera Beutler in 11/06/2012 election). This seems to be determined by the amount of content in the jurisdiction info field to the right, but I would prefer that the office/partisan/term field be stable.
3233	WEI Applets	OVG	Text on buttons at top of OVG	Leave buttons the same width as currently. Make buttons twice the current height for Spanish (es) and Vietnamese (vi) pages. Ensure that text is centered vertically and horizontally on button.
