

VRDB System Improvements

October - December 2013

Application	Location	Description
VRDB	Global Update	Save election date in voting history and transaction history for new voters. (This corrects an issue introduced during the 2012 February VRDB infrastructure upgrade.)
VRDB	Helpdesk	Provide all options to all helpdesk staff so they can back each other up and provide more consistent support to the counties.
VRDB	Helpdesk	Add ability for helpdesk to resend an S5 web update that happens during a transfer.
VRDB	Helpdesk	Correct signature grabber.
VRDB	MV	Send military flag with Motor Voter transactions.
VRDB	Payload	Add precinct code and precinct part to audit checksum. (This will allow precinct changes to be made to VRDB automatically with a bulk audit.)
VRDB	Payload	Add checksum string to the audit packet. (Vendors use this for troubleshooting.)
VRDB	Voting History	MyVote reports voting history off a copy from the VRDB. Automate the process for copying these dates to MyVote after an election.
VRDB	VRDB Extract	Add mailing address state to the VRDB CD that is produced each month for the public.
VRDB Admin	ERIC	Include ERIC deceased report in VRDB list maintenance for easier processing by county staff.
VRDB Admin	ERIC	Include ERIC duplicate report in VRDB duplicate management for easier processing by county staff.
VRDB Admin	Infrastructure	Address browser incompatibility issues.
VRDB Admin	Infrastructure	Upgrade software used to display the VRDB application to county staff.
VRDB Admin	List Maintenance	Add display of military status to the transfer voters' display to help after registration deadlines.
VRDB Admin	Login	Eliminate the need for a user to close the browser after resetting the password.
VRDB Admin	Reports	Lists all categories of the demographic turnout report, even if the value is zero, which allows for automation of reports.
VRDB Admin	Voter Transaction History	Add log entry in Voter Transaction History when an ID fails, and then when it passes.
WEI	Helpdesk	Add tables to the helpdesk copy of the WEI database for reporting purposes.
